Summary:

The Women's March by Tobin Miller Shearer is a comprehensive history of the women's suffrage movement in the United States. The book begins with an overview of the early 19th century, when women were largely excluded from political and economic life. It then traces the development of organized efforts to secure voting rights for women, beginning with Seneca Falls in 1848 and culminating in the passage of the Nineteenth Amendment in 1920. Alongside this narrative are profiles of key figures such as Susan B. Anthony, Elizabeth Cady Stanton, Alice Paul, Carrie Chapman Catt, and Ida B. Wells-Barnett.

Shearer examines how these activists used tactics such as public speaking tours, newspaper campaigns, lobbying Congressmen and Presidents for support, organizing parades and marches throughout major cities across America to draw attention to their cause. He also looks at how they faced opposition from both men and other women who believed that granting suffrage would upset traditional gender roles or lead to social chaos.

The book also explores how African American women had to fight against racism within their own ranks while advocating for universal suffrage; it highlights some lesser known but important figures like Mary Church Terrell who worked tirelessly on behalf of black female voters despite facing discrimination from white feminists.

Finally Shearer discusses how after achieving victory with ratification of the Nineteenth Amendment many former activists turned their attention towards other causes such as labor reform or international peace movements while others continued working on issues related to voting rights including fighting poll taxes or literacy tests which were designed specifically to disenfranchise minority voters.
